### DETAILED ACTION

The claims 1-25 are pending in the instant office action.

#### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-8, 14-20, A nucleic acid encoding a mutant L-serine dehydratase polypeptide wherein position 506-918 of SEQ ID NO: 1 are mutated to give reduced L-serine dehydratase activity.

Group II, claims 9-13, Mutant L-serine dehydratase wherein positions 134-274 of SEQ ID NO: 2 are altered.

Group III, claims 21-24, method of producing l-serine using genetically modified microorganism expressing gene of group I.

The inventions listed in Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature of Group III is the method steps using particular reagents. Said steps include making a product that is not shared with each other. Thus, the technical feature of Group III is not shared with group II.

Furthermore', the technical feature linking group I-III appears to be that they all

Art Unit: 1652

relate to microorganism expressing mutant gene and production of L-serine using said organism. Microorganism expressing mutant gene and production of L-serine using said microorganism does not constitute a "special technical feature" as defined by PCT Rule 13.2, because it does not claim a feature which defines a contribution over the prior art as microorganism expressing mutant gene and production of L-serine using said organism are taught by Lovinger et al. (US pat 4528273).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
